DETAILED ACTION

1. By Amendment filed on 8/28/02, claims 1, 21, 34-35 and 37-38 have been amended and claims 42-50 have been newly added.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21-34 and 45-46, drawn to a composition comprising $\alpha 3\beta 4$ nicotinic receptor antagonist(s).
 - II. Claims 1-20, 37-44 and 47-50, drawn to a process of using said composition for the treatment of an addiction disorder.
 - III. Claims 35-36, drawn to a process of screening a compound for its effectiveness in treating addiction disorders.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the treatment of an addiction disorder can be practiced with another materially different product (e.g., azetidines, tachykinin antagonists, monoamine oxidase inhibitor, selegiline, pramipexole, etc...).

Furthermore, Invention III is distinct from Invention I or II because the search required in Group III is not required for Group I or II.

Art Unit: 1614

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

3. If applicant elects Group II invention, it is subject to further restriction as following.

II(a). Claims 1-20 and 42-44, drawn to a process of using the combination of a first $\alpha 3\beta 4$ nicotinic receptor antagonist and a second $\alpha 3\beta 4$ nicotinic receptor antagonist for the treatment of an addiction disorder.

II(b). Claims 37-41 and 47-50, drawn to a process of using an $\alpha 3\beta 4$ nicotinic receptor antagonist for the treatment of an addiction disorder.

4. Furthermore, applicant is required under 35 U.S.C. 121 to elect a single disclosed species (e.g., Specific Examples of first $\alpha 3\beta 4$ nicotinic receptor antagonist and second $\alpha 3\beta 4$ nicotinic receptor antagonist in the specification) from under the instant claims of the elected Group, if applicant elects Group I or II. Moreover, whatever specific compound is ultimately elected, applicants are required to list all claims readable thereon.

With the election of a specific exemplified compound, a generic concept will be identified by the examiner as the inventive group for examination.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1614

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
